**DETAIL ACTION**

**Election/Restrictions**

1. *Restriction to one of the following inventions is required under 35 U.S.C. 121:*

***Group I. Claims 1-18, 28-29: draw to an apparatus for forming a material on a semiconductor wafer, classified in class 118, and subclass 719.***

***Group II. Claims 19-27: draw to a method of distributing gas during a semiconductor wafer fabrication process, classified in class 438, and subclass 680.***

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. For example, the chemical vapor deposition (CVD) of doped silicon oxide material selected from the group consisting of BSG, PSG, and BPSG (see figures 11A, 11B).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
